DRILLING UPDATE JUNIOR LAKE-NICKEL PROJECT

Drilling on the VW Zone Nickel Project continues to intersect wide zones of nickel sulphide mineralization, extending the existing zone down dip, including drill hole 0407-101 reporting an interval of 6 metres at 1.13% nickel, and along strike to the west, which includes drill hole 0407-109 reporting an interval of 12 metres at 1.02% nickel.

Drilling is intersecting multiple zones of resource grade nickel mineralization, with hole 0407-102 intersecting zones totalling an approximate true width of 51 metres at an average grade of 0.38% nickel across the 150 metre wide VW Zone corridor.

Mineralized intersections in the first 9 holes include:

Drill-hole No	From Metres	Width Metres	Nickel %
0407-99	74.0	11.4	0.56
includes	81.0	1.0	1.23
0407-101	110.0	4.0	0.47
	197.0	4.1	0.47
	302.0	6.0	1.13
includes	305.0	1.0	2.16
	330.0	4.0	0.69
includes	333.0	1.0	1.98
0407-104	105.0	3.0	0.59
	114.0	15.0	0.30
0407-105	233.0	3.0	0.85
0407-106	161.0	5.0	0.59
	220.0	18.0	0.40
includes	221.0	3.0	0.77
0407-109	103.0	1.1	1.11
	119.0	12.0	1.02
includes	122.0	2.7	2.00
	135.0	6.0	0.52
includes	139.0	2.0	0.93

The Junior Lake properties are located in the province of Ontario, Canada, approximately 235 kilometres north-northeast of Thunder Bay and are situated within the Caribou-O-Sullivan Greenstone Belt in the Wabigoon Subprovince.

The VW Zone Nickel Project is located at Ketchikan Lake toward the south eastern end of the Junior Lake property.

Following the successful 2006 drilling campaign on the VW Zone, Scott Wilson Roscoe Postle Associates Inc. (Scott Wilson RPA), Toronto, was retained by Landore to independently carry out a resource estimate for the VW zone and to prepare a National Instrument 43-101 compliant technical report, which was reported on the 19th February 2007.

VW Zone Inferred Resource at 0.2% Nickel Cut-Off Grade,

Tonnes	Ni%	Cu%	Nickel Tonnes	Copper Tonnes
4,202,776	0.34	0.05	14,300	2,100

Scott Wilson RPA recommended that additional exploration drilling be undertaken to expand the resources to depth, particularly on the northern side of the VW deposit where the sub-zones are tested to shallower depths compared to the southerly sub-zones. Similarly further drilling should be carried out on the west side, following which the VW Zone modeling and resource estimate should be updated.

Diamond drilling resumed on the VW Zone in mid-April with 2 drill rigs. A campaign of 60 holes for approximately 13,000 metres is underway, with one rig dedicated to extending the existing inferred resource along strike in both directions and down dip, with the second rig carrying out infill drilling to advance the resource to 'Indicated' status, a requirement for 'scoping' and or pre-feasibility studies.

To date, 20 holes (0407-99 to 0407-119), for 4,723 metres, have been completed. Results are pending for 11 of those holes.

All drill core was photographed prior to being cut for assaying. Samples were analyzed at Accurassay Laboratories (ISO/IEC 17025), Thunder Bay, Ontario, by geochemical analysis with atomic absorption finish (Ni). All samples reporting results of 1% nickel or higher were re-analysed by the assay method with atomic absorption finish. Check assays, standards and laboratory duplicates were performed on a systematic basis at Accurassay Laboratories. ALS Chemex Laboratory in Vancouver, BC also completed systematic checks. Core is stored at site and in Landore's facilities in Thunder Bay, Ontario. Rejects are stored at Accurassay Laboratories and in Landore's facilities in Thunder Bay.

Additional drilling is also planned for further metallurgical studies as well as geotechnical testing on the VW Zone.

Further releases will be made during the summer period as drilling continues.

James Garber, (BSc. Hons. Geology, member of APGO) a Director of Landore Resources Ltd and a qualified person as defined in the Canadian National Instrument 43-101, has reviewed and verified all scientific or technical mining disclosure contained in this announcement, which is stated in accordance with the Canadian Institute of Mining Metallurgy and Petroleum.
